9. The first medical device of claim **7**, wherein said database comprising information relating to said at least one item.

10. The first medical device of claim **7**, wherein said database is a learning database.

11. The first medical device of claim **1**, further comprising a display for displaying at least a portion of said information.

12. A first medical device comprising:

a bar code scanner for scanning information from at least one bar code on at least one item; and

at least one processor, wherein said first medical device is a remote controller for a second medical device, wherein said processor configured to:

process scanned information from said at least one bar code;

determine acceptability of said at least one item;

receive input of an estimate of amount of said at least one item to be used by a user;

calculate estimated bolus amount of insulin required by said user based upon at least one blood glucose value; and

provide information related to said bolus amount and said acceptability of said at least one item to said user.

13. The first medical device of claim **12**, wherein said second medical device is an infusion device.

14. The first medical device of claim **12**, wherein said second medical device comprising a glucose monitoring device.

15. The first medical device of claim **12**, wherein said first medical device further comprising a cell phone.

16. The first medical device of claim **15**, wherein said first medical device further comprising a blood glucose meter.

17. The first medical device of claim **12**, wherein said first medical device is a glucose monitoring device.

18. The first medical device of claim **12**, wherein the processor further configured to compare said scanned information to a database.

19. The first medical device of claim **18**, wherein said database comprising user profile information.

20. The first medical device of claim **18**, wherein said database comprising information relating to said one item.

21. The first medical device of claim **18**, wherein said database is a learning database.

22. The first medical device of claim **18**, further comprising a display for displaying at least a portion of said information.
